Professional Summary

Aspiring Machine Learning Engineer and Data Scientist pursuing a B.Tech in Computer Science and Engineering at the University of Lucknow with an 8.89/10.0 CGPA. Specialized in predictive modeling, computer vision pipelines, and intelligent automation frameworks. Highly proficient in algorithmic model training using Python, Scikit-learn, OpenCV, Pandas, and NumPy. Demonstrated success in deploying analytical tools and managing end-to-end data pipelines to optimize predictive accuracy.

Education

University of Lucknow – *B.Tech in Computer Science and Engineering* (CGPA: **8.89 / 10.0**)

Expected Graduation: May 2027

Lucknow, UP

2023 – 2027

L.P.S. Bulandshahr – *Class XII (UP Board)* – Percentage: **88.4%**

Bulandshahr, UP

Completed

2022

Technical Skills

- **Machine Learning & AI:** Supervised Learning, Predictive Modeling, Computer Vision, Feature Engineering, Exploratory Data Analysis (EDA), Model Training & Hyperparameter Tuning
- **Data Science Libraries:** Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Seaborn
- **Languages & Databases:** Python, Java, SQL (MySQL), C++, JavaScript
- **Developer Tools & Core Concepts:** Git, GitHub, Database Management Systems (DBMS), Object-Oriented Programming (OOP), Tkinter, Systems Architecture

Technical Projects

AI-Based Face Recognition Attendance System • *OpenCV, Python, MySQL, Tkinter*

June 2025 – July 2025

[GitHub](#)

- Engineered an automated attendance tracking framework parsing up to 50+ concurrent image profiles via OpenCV.
- Implemented localized facial pattern processing matrices to achieve over 90% face recognition classification accuracy.
- Designed an algorithmic central GUI dashboard, streamlining manual processing lag by approximately 70%.

Machine Learning Prediction Models • *Scikit-learn, Statistical Modeling, Data Science*

2025

[GitHub](#)

- Built and validated supervised ML models using Logistic Regression and Random Forest algorithms on Titanic and Iris datasets.
- Attained an 89% prediction accuracy baseline via structured data preprocessing, outlier removal, and custom feature engineering.
- Conducted comprehensive Exploratory Data Analysis (EDA) evaluating 10+ feature variables on 1000+ matrix rows using Pandas.

Smart Billing and Invoice Automation System • *Full-Stack Engineering, Node.js*

2025

[GitHub](#)

- Architected a responsive invoice platform handling 10+ relational database schema operations via React and Node.js.
- Created high-throughput frontend endpoints streamlined to compute and handle 100+ concurrent operational datasets efficiently.
- Boosted workflow data validation structures to elevate organizational system efficiency by 60%.

Sky Shaper Suite • *Data Visualization, UI Engineering*

2025

[GitHub](#)

- Built an environmental visualization platform tracking 5+ distinct air quality metrics across interactive data panels.
- Accelerated browser asset processing pipelines, cutting data loading and rendering latency by 30%.

Cafe Management System • *Algorithm Design, Data Structures*

2024

[GitHub](#)

- Developed an automated transaction pipeline processing an array of 100+ menu items with integrated validation.
- Refactored index array lookup functions to reduce calculation latency and customer checkout delays by 45%.

Leadership Experience

Technical Mentorship and Project Leadership – Peer Mentor & Coordinator

2025

- Mentored a group of 10+ engineering peers in foundational Python semantics, system debugging, and core ML theories.
- Supervised collaborative development groups tasked with building and deploying 7+ technical software products.
- Enhanced module integration metrics, reducing development lifecycle integration errors and merge bugs by 40%.

Certifications

- **Face Attendance Training:** Python and Computer Vision Techniques (2025) • [Certificate](#)
- **Forage Virtual Experience:** Data Analytics Job Simulation (2025) • [Certificate](#)
